# Algoritma:

1. Mulai
2. Input jumlah baris
3. Inputt jumlah kolom
4. Cetak MULTIPLICATION TABLE
5. Buat looping degan iterasi i degan iterasi sebanyak jumlah baris
6. Di dalam looping i, buat looping iterasi j degan iterasi sebanyak jumlah kolom
7. Di dalam looping j, cetak (i+1) * (i+1) dengan akhiran "\t"
8. Di dalam looping i, setelah looping j, cetak garis baru dan "-" sebanyak 80x
9. Selesai

# Flowchart:

# Code:

https://github.com/vennius/pemrograman-komputer/blob/main/Pertemuan6/sk5-No2..py

# Output:

```
stevennius@labs:~/Labs/College/Programming/Pertemuan6$ python3 sk5-No2..py
Masukkan jumlah baris: 10
Masukkan jumlah kolom: 10
MULTIPLICATION TABLE:
1       2       3       4       5       6       7       8       9       10
--------------------------------------------------------------------------------
2       4       6       8       10      12      14      16      18      20
--------------------------------------------------------------------------------
